

## Homework and Home Learning

Homework is non-statutory and there is no requirement to complete a set amount each week. Our minimum expectation is that all children should read regularly, ideally every day. In addition, spelling and maths practise is also important and homework for these two areas will also be set regularly from Year 1 onwards.

### Reading

At Summerlea, we promote reading for enjoyment and pleasure. We want all children to love reading and be able to talk about books they have enjoyed and learned from. In all year groups, reading books are provided for each child and these are matched to the child's reading ability and/or interest (with children taking increasing responsibility for their own book choices as they mature). We provide our children with home/school reading record books from EYFS up until the end of Year 3, and parents and carers are encouraged to write a comment inside and to sign these when they hear their child read or when they share a book together to help inform teacher assessment. Reading and understanding a full range of text types and authors will not only bring pleasure but can also develop comprehension, spelling and writing skills. Encourage your child to share and talk about texts with you, visit your local library, hear them read, read to them and enjoy reading together.

### Spellings in Key Stage 1

5 words will be given out every week in a small yellow book. The spellings will be from the pattern that is being taught that week. The children will practise these spellings in school and we ask that you also spend some time practising them at home too. We will test the children on this spelling pattern each week. For information, the common exception words for your child's year group will also be attached to the front of their spelling book.

### Spellings in Key Stage 2

8 words will be given out every week in a small yellow book (or planner in Year 6). The spellings will be from the pattern that is being taught that week. The children will practise these spellings in school and we ask that you also spend some time practising them at home too. We will test the children on this spelling pattern each week. For information, the common exception words for your child's year group will also be attached to the front of their spelling book.

### Maths in Key Stage 1 and 2

We encourage the practising of key mental maths skills and would like children to practise their number bonds, doubling and halving and times tables. More practise will lead to better retention! All children will be set online maths homework each week, on MyMaths.co.uk. Regularly completing these online lessons and tasks will help your child consolidate learning and deepen their understanding of each area of maths. Please try to find time to explore this excellent resource with your child. Children will be sent home with login details and instructions. If your child is unable to access MyMaths at home, please inform your class teacher.

Our Homework and Home Learning Policy is available to view via our website at

<http://www.summerlea.w-sussex.sch.uk> > School Information > Policies. You can also visit the Learning Zone on our website where you can access ideas and suggestions to support key areas of learning as well as links to other websites. Please speak to your child's class teacher if you have any questions.

## Year 1 Spring Term 1, 2022

### 6 things to try before half term...

In addition, and in the same vein as the National Trust's '50 things to do before you are 11 ¾' we provide 6 suggested activities, linked to the year group topic, your child might like to have a go at during the course of a half term. The suggestions are simply that; ideas to get you and your child thinking about fun and creative ways into exploring learning themes.

<p><b>1. Bridges</b> <i>On a day out see if you can spot some bridges – think about what they are made from and how they have been designed for their purpose. You could take a picture of, or draw, the bridge you discovered!</i></p> 	<p><b>2. Materials Survey</b> <i>Choose a room in your house and conduct a 'Materials survey!' What materials can you see? Which material is there most / least of? Could you make a tally chart to show your findings?</i></p> 
<p><b>3. Fairy tale retelling</b> <i>Can you share a special story time where you retell your favourite fairy tale to someone at home? You could use props or add sound effects to make the story come alive!</i></p> 	<p><b>4. Nifty number bonds</b> <i>Can you make up a game that will help you to learn and remember all the bonds that make 10? Can you teach it to a friend?</i></p> 
<p><b>5. Marvellous maps</b> <i>Ask a grown up if they will take you for a walk using a real map or a map app on a smart phone. Can you recognise some landmarks marked on the map? Can you follow the map for the whole of your journey?</i></p> 	<p><b>6. Circuit design</b> <i>Can you create your own fitness circuit? Think about which exercises you want to include that will work your whole body! Can you repeat this circuit each week and see if you notice a difference in your fitness level?</i></p> 

***If you think of any more topic related tasks to do feel free!  
We'd love to hear about, look at and learn from them.***
