

## Continuation of learning – Year 1 week 9 Day 1 08.06.20

Hi Holly and Oak class. Welcome to a new week of learning! We are finishing some activities on Pippety Skycap this week and then we have a new story to begin! Enjoy the activities this week 😊

### Maths

Please follow the link to your White Rose Learning

Today's lesson is:

Lesson 1 – finding a half

### English

Please complete pages 23 and 24 of the booklet. You need to measure your family in 'Pippety's!'

You may find it easier if you ask them to lay down to do this.

Then you need to write up your findings. Do you remember how we used the suffixes 'er' and 'est' to compare? You will need to use these today!

As an extension you could find some other objects to measure in 'Pippety's' – I wonder if you can find an object that is exactly 1 Pippety tall? How about 10 Pippety's?

## Other learning:

This week we are going to look at puppets all week! We will be researching and making puppets, and hopefully you will get to put on a show at the end of the week!

Today can you see if you can find any child friendly puppet shows on google to watch. **Ask a grown up to do this with you.**

<https://youtu.be/TyLsO6LpLSI>

<https://youtu.be/G2b4vUZ7wR4>

**NB: Parents, you may like to talk about how puppetry has changed over the years.**

Try to answer these questions about the videos you watch.

**Which was your favourite show? Why did you like it?**

How did the puppets move? Can you work out their mechanisms? Were they string puppets, or hand puppets or were they moved in a different way?

**What happened in the show? Was there a story or plot that was followed?**

In the Victorian times children used to enjoy 'Punch and Judy' shows. You can still watch these today especially at the seaside and in parks.

Can you do some research on punch and Judy shows? What can you find out about them?
