Home Learning (years 1-6) – **'My Maths'**

Dear Parents / Carers

Many of you will already be familiar with My Maths, an online learning resource. This internet-based programme provides maths lessons, practice activities and games, which will support your child's understanding in all areas of the maths curriculum. This program is widely used in primary and secondary schools in the UK, and we have witnessed very positive results when children and parents made regular use of the resources at home.

All children will be set online MyMaths homework each week.

Completing these online lessons and tasks will help your child consolidate learning and deepen their understanding of each area of maths. Please try to find time to explore this excellent resource with your child. If your child is unable to access MyMaths at home, please inform your class teacher.

How to get started:

Please find you child's login details and instructions on the back.

Once logged in to My Maths, you will have the following four tabs, as shown below: Homework, Games, Results and Resources. You will be able to access set homework activities, along with an accompanying lesson, under the Homework tab. However, by using the Resources tab, you are able to access lessons and activities from every year and every area of the maths curriculum. You may wish to explore the year groups' resources either side of your actual year group, and you will be able to see your progress under the Results tab.

My Maths recommends that a laptop or desktop computer is ideal; however, we have found that most tablets and phones are also suitable - you might just be asked to download 'Puffin Academy' to enable some of the content of My Maths on some devices. If you are required to download Puffin Academy, you will then need to search for mymaths.co.uk within the Puffin Academy App, rather than using your normal web browser.

Thank you for your continued support with home learning, and please don't hesitate to speak to your child's class teacher.

Mr Anderson
